

# IEC QUALITY ASSESSMENT SYSTEM (IECQ),

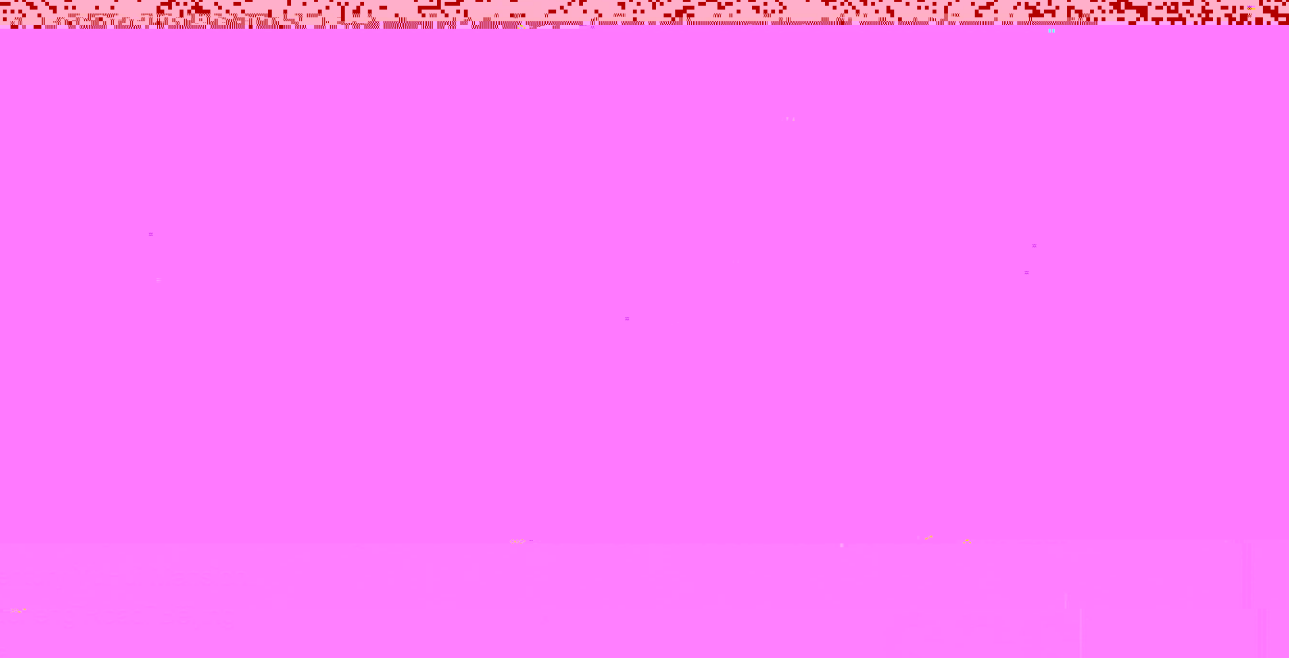

covering Electronic Components, Assemblies, Related Materials and Processes

From the United States of America: [www.iec.org](http://www.iec.org)

IECQ is a voluntary, self-regulating system of quality assurance for electronic components, assemblies, related materials and processes. It is based on the ISO 9000 family of standards, which are the international standards for quality management systems. IECQ is a global system of quality assurance for electronic components, assemblies, related materials and processes. It is based on the ISO 9000 family of standards, which are the international standards for quality management systems. IECQ is a global system of quality assurance for electronic components, assemblies, related materials and processes. It is based on the ISO 9000 family of standards, which are the international standards for quality management systems.
